

Q: AT WHAT POINT DOES ABSENTEEISM AFFECT
YOUR STANDARDIZED
TEST SCORES?

A: Let's not find out. Asthma is the #1 cause of absenteeism among chronic diseases. Some Michigan schools are plagued with triggers that increase missed school days. So while we can't say for sure how much lower your test scores might be, we're quite sure it's bad for business.

Is asthma a risk you're willing to take?
