

IS YOUR SCHOOL **ASTHMA** FRIENDLY?

When asthma is under control, ER and hospital visits should rarely be needed!

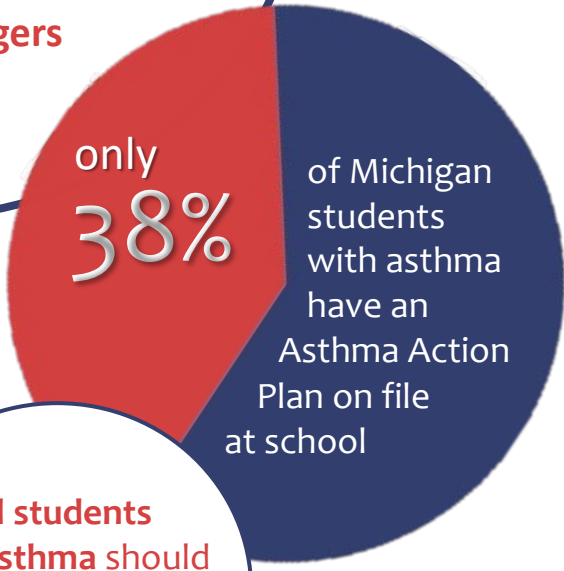

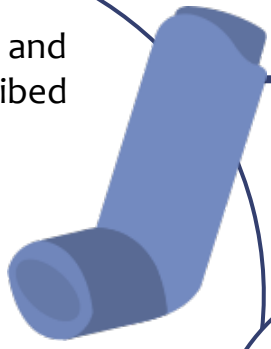

GET THE FACTS!

Schools can help keep students with asthma in class and breathing easy!

- ✓ Visit Michigan.gov/asthma
- ✓ Learn what to do for symptoms
- ✓ Track down Asthma Action Plans
- ✓ Find & remove triggers

When asthma is under control, students are healthy, ready to learn, and should rarely miss school!

Michigan law:
Students can carry and self-administer prescribed asthma inhalers and allergy medications on school grounds and during school sponsored activities, yet **27%** of Michigan students with asthma aged 10-17 say they are **not allowed to carry their medication with them at school!**

All students with asthma should have an Asthma Action Plan on file at school!
